ROcodeFest · Season 1

Official Rules

Two stages, one identical challenge for every team, and a live final to decide the winners.

General Rules

- **Same task, every city.** Fairness comes first — nobody gets a locational advantage.
- **Team size and eligibility.** Open to student teams, any experience level, with a coach or mentor.
- **Club structure.** A club can register multiple teams, each in a different category (Robotics, Programming, Design, etc.).
- **Conduct.** Standard fair-play and safety rules apply at every stage. Unsportsmanlike behavior results in disqualification.
- **Intellectual property.** All work submitted must be the team's own. Plagiarism or unauthorized use of external code/designs leads to elimination.
- **Appeals.** Each team can file up to 3 appeals per event day, referencing a specific timestamp in the live feed. After 3 rejected appeals, no further appeals are accepted.

Season Challenge Rules

- **City challenge (Stage 1).** Every team completes the identical mission in their own city within the same deadline. Scoring is standardized across all cities.
- **Scoring rubric.** Four criteria: Innovation (1-10), Technical Execution (1-10), Presentation (1-10), Teamwork (1-10). Maximum total: 40 points per judge.
- **Advancement.** The highest-scoring teams from each city advance to the final. The exact cutoff depends on the number of participants.
- **The final (Stage 2).** Held live in Piatra Neamţ. Top teams compete head-to-head in a live-judged event. Results are final, subject only to the appeals process.

- **Prizes.** Cash prizes for top finishers, sponsor vouchers for runners-up, and founding-team recognition for every team that participated in Season 1.
- **Certificates.** Generated automatically once results are finalized and available for download from each club's profile.
